

**SYSTEM FOR PROVIDING CONTINUITY OF A BROADCAST BETWEEN  
CLIENTS AND METHOD THEREFOR**

**Abstract of the Disclosure**

5           A communication system (10) comprises a plurality of clients (12) including a  
first client (18) and a second client (20). Within the communication system (10),  
continuity of one or more of a plurality of broadcast events (14) is provided between  
the plurality of clients (12). The first client (18) monitors a broadcast event (34).  
Thereafter, the second client (20) launches monitoring of the broadcast event (34) in  
10   response to an occurrence associated with the broadcast event (34).
